

INJABIN ALAM

SOFTWARE ENGINEER • FULL-STACK & SYSTEMS DEVELOPER

Dhaka, Bangladesh • injabin29@gmail.com • injabin.github.io • github.com/ninja-bean • linkedin.com/in/injabin

• hackerrank.com/malam2330344

PROFESSIONAL SUMMARY

Results-driven Software Engineer with proven hands-on experience building performant full-stack web applications, scalable backend systems, real-time telemetry pipelines, and algorithmic solutions. Track record serving as Scrum Master leading engineering teams, engineering high-throughput 3D WebGL simulators, and developing award-winning IoT platforms. Strong computer science foundation in Data Structures, Object-Oriented Architecture, and Distributed Services. Seeking software engineering roles across the enterprise software and IT sector.

TECHNICAL COMPETENCIES

Languages:	TypeScript, JavaScript (ES6+), Java, C++, Python, PHP, SQL (MySQL/PostgreSQL), HTML5, CSS3
Frontend & 3D:	Next.js (App Router), React, Three.js, WebGL, Zustand, Tailwind CSS, Component Architecture
Backend & Systems:	Node.js, Express, RESTful APIs, WebSockets, MQTT Protocol, JDBC, Relational Schema Normalization
Engineering Practices:	Agile / Scrum Master (HP Certified), Data Structures & Algorithms (5-Star HackerRank), OOP Design Patterns, CI/CD, Git
Hardware & IoT:	ESP32, Microcontrollers, Telemetry Streaming, Sensor Calibration, Autodesk Fusion 360 (Parametric CAD)

FEATURED SOFTWARE ENGINEERING PROJECTS

AlgoArena – 3D Pathfinding Visualizer & Heuristic Search Simulator

REACT

TYPESCRIPT

2025 • [Live Demo](#) • [GitHub](#)

THREE.JS

ZUSTAND

- Implemented bidirectional A*, bidirectional BFS, simulated annealing, and hill climbing algorithms racing concurrently on dynamic 3D mazes.
- Extended classical algorithms to support multi-goal pathfinding heuristics and dynamic temperature cooling for local optima escape.
- Architected global state management in Zustand and WebGL render pipelines in Three.js, guaranteeing smooth 60fps performance during heavy wave explorations.

Nexus Stock AI – Fintech Market Analytics & Generative Intelligence Engine

NEXT.JS

TYPESCRIPT

2025 • [Live Demo](#) • [GitHub](#)

GEMINI API

TAILWIND

- Served as Scrum Master for a 4-person engineering team, leading sprint planning, backlog grooming, PR reviews, and API contract specifications.
- Engineered a modular Next.js dashboard coupling live candlestick market feeds with contextual generative AI summaries via Google Gemini.
- Designed resilient API request handlers with client-side caching and fallback states to mitigate upstream rate-limits.

AquaSweep – Autonomous Aquaculture IoT Platform & Live Telemetry

ESP32

C++

2024 • [Award: 3rd Runner-Up](#) • [GitHub](#)

MQTT

NODE.JS

- Engineered end-to-end telemetry system collecting physical sensor telemetry via ESP32 microcontrollers and publishing over MQTT broker.
- Developed a real-time responsive web dashboard for continuous environmental tracking and remote motor actuator dispatch.
- Awarded **3rd Runner-Up** at the UIU CSE Project Show for outstanding embedded-software reliability and architectural cohesion.

NextNest – Enterprise Property Management Relational Database Engine

JAVA

MYSQL

JDBC

OOP

2024 • [GitHub](#)

- Architected normalized relational schema ensuring ACID transaction safety across complex property, tenant, and billing workflows.
- Structured code adhering to DAO and MVC design patterns, separating relational persistence, business logic, and graphical workstation views.

GovConnect (DhakaGrid) – Civic Incident & Municipal Emergency Management Platform

PHP

2024 – Present • [GitHub](#)

MYSQL

NEXT.JS (REWRITE)

- Engineered municipal reporting application handling citizen incident reporting, verification lifecycles, and resolution tracking.
- Currently architecting a production modernization migrating backend services to Next.js App Router and TypeScript server actions.

PROFESSIONAL EXPERIENCE

Outlier – AI Data Contributor (Technical Evaluator) Sep 2026 – Present • Remote

- Evaluated and benchmarked complex programmatic and multimodal LLM outputs against strict quality and correctness rubrics.
- Provided structured code analysis, edge-case vulnerability assessments, and technical documentation to improve generative AI reliability.

UIU CanSat Team – Engineering Intern (Airframe & CAD Modeling) Aug 2025 – Aug 2026 • Dhaka, Bangladesh

- Engineered complete parametric 3D CAD assemblies in Autodesk Fusion 360 for an autonomous fixed-wing VTOL aircraft.
- Researched aerodynamic airflow properties using the NACA 4412 airfoil profile to optimize lift-to-drag efficiency during low-speed transition.

EDUCATION

United International University (UIU) – B.Sc. in Computer Science & Engineering 2022 – Present • Dhaka, Bangladesh

Key Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

CERTIFICATIONS & DISTINCTIONS

Agile Project Management – HP LIFE eLearning ([Verify Credential](#)) May 2026

Data Science & Analytics – HP LIFE eLearning ([Verify Credential](#)) May 2026

5-Star Java Problem Solving Badge – HackerRank ([Verify Profile](#)) Verified High-Tier Rank

University Physics Olympiad (UPC 2025) – Accomplishment Award ([Competition Repo](#)) 2025
